SUMMARY

Fullstack Developer and IT Support professional with 7+ years of experience in enterprise and banking environments. Proven in building production-ready web applications, automating operational workflows, and maintaining large-scale IT infrastructure. Experienced in React, Express, and relational databases, with a strong background in end-user support, system hardening, and IT operations. Adept at bridging technical operations and software development to deliver efficient, reliable systems.

EXPERIENCES

PT. Bringin Inti Teknologi Jakarta, Indonesia
IT Technical Support (Full Time) Feb 2019 - Jan 2026

- Manage the full lifecycle of technical support for over 1,000 IT assets (PCs, laptops, printers) across two major Bank BRI branches.
- Lead the execution of technology refresh projects, including the deployment and configuration of hundreds of new devices to enhance user productivity and security.
- Implement system hardening procedures on endpoints to reduce security vulnerabilities and ensure compliance with banking cybersecurity standards.
- Designed and developed a React.js-based internal system to automate sticker generation, producing 500+ print-ready PDFs monthly and eliminating manual Excel-based workflows.
- Automated technicians' daily work reports using a Telegram bot integrated with Google Spreadsheets, saving the field team up to 2 hours each month.

Equatorcell Jakarta, Indonesia
Fullstack Engineer (Freelance) Jul 2025 - Sep 2025

- Developed both customer-facing e-commerce pages and an admin dashboard using React, Express.js, and MySQL, supporting filtering, cart functionality, and checkout with payment gateway.
- Implemented REST API endpoints and relational database schemas.
- Integrated shipping service and Implemented shipment tracking.
- Built a responsive admin dashboard with role-based access to manage 50+ products, pricing updates, and monitor transaction records, styled with Tailwind CSS.

Dmens Barbershop Jakarta, Indonesia
Fullstack Engineer (Freelance) Jun 2024 - Oct 2024

- Developed a web-based barbershop reservation system with online booking and real-time schedule management.
- Built admin and manager dashboards to manage 20+ branches, reservation records, barber schedules, services, and daily operational reports.
- Implemented a cashier system to handle service transactions.
- Designed and implemented relational database schemas and full CRUD operations to support multi-branch reservations, scheduling, and transaction workflows.

PT Jaring Data Nusantara

Yogyakarta, Indonesia

IT Network

Jul 2017 - Aug 2018

- Managed and maintained ISP network infrastructure to ensure stable internet connectivity, including basic configuration and troubleshooting of network devices.
- Handled customer network installation and issue resolution, addressing connectivity, routing, and performance problems to meet service quality standards.
- Monitored network performance and responded to incidents or outages, collaborating with field technicians to minimize service downtime.

EDUCATION

Universitas Raharja

Bachelor's Degree of Information Engineering

GPA: 3.70/4.00

Tangerang, Indonesia

Oct 2020 - Oct 2024

TRAINING

Backend Web Development Bootcamp

Skilvul

Online

Feb 2023 - Jun 2023

SKILLS

Programming Language	: JavaScript , Typescript, PHP
